PROFILE

I'm a **16-year-old Full-Stack Web Developer** and student at **NODET (SAMPAD)**, passionate about building scalable, reliable, and high-performance web applications.

I specialize in **Django** and **Django REST Framework (DRF)** for backend development, while working with **JavaScript** frameworks and modern frontend technologies for the client side.

As one of the **Top 10 young developers** in Iran, I've led and collaborated with a talented team of developers—each ranked among the best in national programming competitions—delivering real-world full-stack projects with high technical standards.
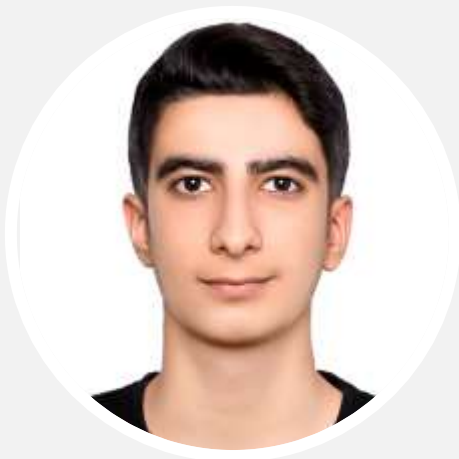

WORK EXPERIENCE

back-end Developer: gavahino.ir

Bushehr-Iran | August 2025

Gavahino is an online platform that streamlines and digitizes the process of **issuing certificates** and appreciation plaques. It ensures **document authenticity** and **security through** a reliable digital verification system. The first phase of the project has been successfully launched, marking a significant step toward modernizing official certification management.

Key Features:

- Professional **UI/UX** design for a smooth experience
- Developed with **Django** and **React.js** frameworks
- High security with **JWT Authentication**
- Advanced **validation system** for authentication and accurate data input
- **OTP-based SMS service** for secure user verification
- Scalable infrastructure prepared for future features (including **online payment gateway** in upcoming phases)
